ATTEMPT AT HIGHWAY ROBBERY NEAR STRAWBERRY VALLEY—THE ROBBER GETS WORE THAN HE ASKED FOR — On Saturday construction of the state of the state of strawberry, on the shippery ford road, an Irishman having in his possession some \$500 in coin, was attacked by a highwayman who presented a cocked pistol to his head and demanded his money. The only reply made by the Irishman was a ray on the arm of the highwayman with sishels with a succession of blows on the head He left the highwayman on the road bleeding, and made his way leisurely to the first house, bringing with him the pistor belonging to the robben, and related the story, at the anine time telling this bearers that if they wished, the result find the highwayman at the point he attacked him. Parties immediately loft in search, and found him severely it not fately, wounded, have meanined attacked him. no berson entries of the proves by income of the constant of t

The signs of the times indicate that the con blustion which has sought to control the pro luce market; to ignore or depreciate the Naal currency and substitute therefor that myth yelept "a gold basis," is likely to find it a "hard road to travel." On next Monday, the Convention called by the Church to carry out the beheets of the combination, will meet; but as the time approaches, the movers, it is evident, begin to fear that "counsel" will not prevail. Therefore every outside and extranfort is being made to impress upon the opic the organ accounty of carrying out e policy, inaugurated of the Tabernacle and deried by he creates. Among the means neh in voges in this Territory to enhance the prices of produce, the most usual and here tofore effective has been a persistent attempt to convince outsiders, if not themselves, that the creps are to be a partial or a total failure Almost every year about harvest time, or just before, the most alarming accounts are disseminated. Sometimes the ravages of the grasshoppers are told of; then the crickets are coming in huge devouring bands; again we bear of a prospective drought, which is to wither our fields and "dry up" everythingexcept indeed the alarmists themselves.

Taking advantage of the fact that several years ago, when the community was young. oppers passed over the country in myriads and destroyed every living herb and bush, the schemers lose no opportunity of recalling the year of famine, and with prophetic eye seeing the occasion repeat itself. Yet the grasshoppers de not come ; the crops yield abundantly; a few profit by the terror spread abroad, and another season is waited for to repeat the same or a similar story. Early in this Summer the report spread widely from mouth to mouth, and letter upon letter appeared in one of the newspapers, retailing the won. derful tale of the ravages of crickets down South; how the inhabitants, tremuleus with slarm. yet valient in the fray, turned out from Spanish Fork and vicinity to grapple with. and turn back the army of bugs (to which "hum " should have been prefixed). Judging from the consternation exhibited, there was imminent danger that the crops of the Territory were about to be devoured by the cricksis ere the barvest came. A trip southward about this time enabled us to judge something of the facts of the case. We made diligent inquiry, and used our eyes most persistently to hear and see the coming evil.

Our most diligent search, however, failed to and snything more alarming than a few jumping crickets on the great flat between Spanish Fork and Payson, apparently as harmless to the crops—wifes away—as sucking doves, and in fact, too limited in numbers to seriously affect a two acre garden, even if transported to it. The alarm attempted to be created was a signal fallure. It must have originated in be brain of some tremulous old woman, or was gotton up for a purpose by wily men.

For the last two weeks, and as the Convention time approaches, the story takes a new shape. Notwithstanding the undoubted fact mountains during the winter; that the rains this spring and even this snamer have been ons than for years before ; and that the crops all over the Territory present the most promising appearance, the cry is going up that the drought is upon us, the stream are failing, and the day of famine has arrived. It is of course to be expected that late in the summer some of the smaller rate courses will dry up, and the larger streams not pour such e floods from the mountains, but we entertain the strongest doubt, that the most timid can seriously believe that anything like a drought need; be anticipated. Isolated instances can probably this year as heretofore, be found and they are duly paraded in the papers in the interest of the combination where gardens in pertain situat ing for want of water; or where fields would be better if larger streams ran through the But we deline that these are the exception

drops this y likely to be scanty for want

We have just conversed with as intelligent rentleman who has made the tour of the Southern counties, and he informs us that the talk of small crops of want of water is all bosh. The wheat, out and barley crops look fine, and will yield most abandantly. Hven as far south as Cedar City, on the edge of the Great Basin, the barvest is most prolific, and be heard no complaint of dearth or drought. We have ourselves, but a day or two since. visited and examined the farms in Weber valley, and were gratified and astonished while looking upon the splendid crops throughout that prolific region. Many of the farme there, we were told, would yield searly if not quite seventy-five bushels to the acre. We suspect that all this talk about drought is intended to have its bearing on the Convention about to assemble, and give exense to it to establish enormous prices for grains "on s gold basis." If the Convention, which will, we presume, be composed mainly of farmers, allows itself to be bamboozled by such tales. we do not believe that the balance of the community will be. We shall make every proper effort to set the facts before the country as they actually exist, and not as speculators would have them.

Treasures on Earth-In Bacon there is Bafe-tv.

For sometime past friend Kerr (the chief of Clark & Co.'s well known banking bouse) has been doing a safe business with closed doors A piece of paper near the entrance of the place where miners "or any other man" were wont to congregate, briefly announced in large letters, "No admittance," which was inexplicable 'till some considerate wag appended underneath "into Kerr's Safe." The fact is, as most everybody now knows, that Kerr one night locked up his plethoric money bags. retired to his peaceful couch and dreamed of cent. per cent., Bannack dust, Legal Tenders. Brigham and the law and the profits, when lo! on arising the next morning and attempting to open his splendid Bacon-burglar-proof institution, he found he was a victim of misplaced confidence. The thing would'nt work-he could'nt get into the tarnation thing-his money, though not very profitably, was safely deposited. Day by day has Kerr worked and toiled, but all in vain. Bacon's lock seems involverable to either burglars or honest men (among whom our friend Kerr ranks?) At length an enterprising locksmith tenders his services, and agrees to open the safe within four days or forfeit \$500. If he succeeds Kerr is to pay him \$500. In other words the Banker bets the Locksmith that he can't open the safe in four days-and thereupon the banker chuckles and insists that it is a good bet if he loses A locksmith has been at work three days, and his time will expire we believe to-day. He is hopeful and confident, and so is Kerr. The latter is placid; and so bours "on change" he smokes his dear while other bankers are fuming and tolling with their customers; when night comes he has no long lines of figures to foot ap, no mathematical abstractions to puzforget; the price of good effects not his nerves, and be seen in his vest pocket, and no thought of the morrow.

He congratulates himself that he has attained the reward of the good man spoken of in Scripture, for verily bath he "laid up his treasure (greenbacks) where moth and rust do not corrupt, nor thieves break through and steal." A little boy shouts "bully for Kerr," but if Locksmith gets into that safe, we say " bully for enterprising Locksmith."

Suggestions.-In another column we exract from the Sacramento Union a letter containing some valuable suggestions as to the raising of a military force for the protection of California from the bandits and would-be Claude Duvals of the highway, who have of late inflicted so much damage on individuals and on the general reputation of that State The suggestions are well deserving the attention of these in authority, and it some to us that the carrying them out would do good.

The following communication, from a soldier, we clip from the Sacramento Union of June 27th:

Threats of Secessionists. Messrs Editors: The silly threats of C. L. Weller should be a caution to our people that are men unprincipled enough to take advantage of the great number of unemployed laborers, of disappointed fortune-seekers returning to this State deprived of all resources, to excite them to take the highway to retrieve their fallen fortunes, deluding them with the idea that in so doing they are only taking an illustrious part in the greatest of all modern ramas, and that in future ages their renown will equal that of the American Bayard. That bere is a necessity for an increased armed lorce in this State, no one will pretend to deny; but how to distribute that force and employ it so as not to disgust the army by the idleness of garrison life, is a problem yet to be solved. One of the most feasible ways, and peradven ture the most popular perhaps in the eyes of the people, would be an organization similar to the Irish Constabulary or the French Gend-armerie—the organization to consist of cavalry and infantry under the command of one Colonel, with head-quarters at San Francisco, to be the Provost Marshal General for California, Oregon and Washington Territory; one Lieuenant Colonel at Portland, Oregon, with three companies of cavalry and two companies of infantry, to be stationed in Oregon and Wash-ington Territory; three Majors, at Sacramento. tockton, and some town in Lower California. with one company of cavalry or infantry in each county—each company to be recruited in the county in which it is to be stationed, and to consist of men who have been honorably discharged, and to receive the same pay a the soldiers of the regular service, but in gold or the equivalent in Government current the companies to be divided into squads in the different townships, and to perform in addition o their other duty s as soldiers such duties as they may be called upon to perform by the civil authorities of the county in which they are stationed. Very soon murders, robberies, incendiary fires, treasonable meetings, and every other crime which now fills the State matters of tradition, and the extra expense of such a force would be compensated by the reduced taxation in the State. In case of a foreign war, each of those companies would become the nucleus of a regiment, as great discretion being used in filling up the ranks of the Provost Guard, every member thereof could, in an emergency, become an instructor for raw recruits. Thus would be defeated the for raw recruits. Thus would be deleated the visionary schemes of C. L. Weller and consorts. Great care, however, should be used in selecting the officers of such a force, that no one should be appointed who, in addition to inflitary qualifications, has not a fair administrative talent and a sufficient knowledge. of statutory law so that they could not in any emergency without the delay of consultation, references and other circumlegatory process, during which a criminal would escape, or that by an over hasty vigilance as isnocent man

HEAD-QU'S, ARMY POTOMAC, July 30th. Additional from the Army Potomac : Adhpatch says the colored treops seemed to be without any one to manage them, and finally fell back to the rear out of range of the vet leys of canister and musketry that were plowing through their ranks. Their losses are very heavy, as shown by the following report: Of the 23rd U. S. colored, fifteen officers and four hundred men were killed, wounded and miss ing. Of the 28th, eleven officers and one hab dred and fifty men were killed, wounded and missing. Of the 27th, six officers and one hundred and fifty men. Of the 29th, eight officers and two hundred and seventy-five men. Of the 31st, seven officers and about two hundred men. Of the 39th, several officers and about two hundred and fifty men. The loss of the 2d division of the 9th corps, Gen. Ledlie commanding, is estimated at one thousand or twelve hundred, while many place the figures higher. Gen. Bartlett succeeded in reaching the fort with his command, but having by accident broken his cork leg. could not get of the field. He held possession of an advanced position several hours, and only sorrendered when all hope of escape was lost. About two hundred men were with him at the time, a few of whom managed to get away. Nearly all his staff were captured with him. Col. Marshall, commanding the 2d brigade of this division, is also captured with several of his staff The loss in the 1st and 3d brigades is also se. vere. The latter have four bundred in the hospital. The 18th corps occupied that part of the line on the right, but their loss is not very great. We took about two bundred and fifty prisoners, mostly South Carolinans, and five battle flags. Cairo, Ausgust 2d. Orleans dates to the 26th, says: The Constrational Convention adjourned the day been fore, and is to be convened again in case the Constitution is not ratified by the people. Refore the adjournment of the Convention, by a vote of 68 to 8, the Convention adopted a Presmble and Resolutions denouncing the doctrine of State Rights and State Sovereignty, interpreted as they have been into a justification of secession, as utterly subversive of our form of government, tending to confusion, anarchy and national destruction.

Resolved, That we hold our primary alleglance due to the Government of the United States; that the Constitution and Laws of the United States are the supreme law of the land, anything in the Constitution and laws of any State to the contrary notwithstanding; that no State Convention whether representing the people or not, has any right to absolve us from that allegiance; that consequently the Act, commonly called the Ordinance of Seces sion, has always been null and void.

Resolved, That we are in favor of so amending the Constitution of the United States as to ecure the abolishment of slavery throughout

About one thousand Union prisoners, mostly taken a year since, arrived at New Orleans on the 24th from Texas, having been exchang ed. Four to six thousand are still confined at Fort Tyler.

Washington, August 2d. An apparently well informed deserter says the only troops operating in the valley are Breekenridge's. Early was first sent up, and just before starting drew rations for 10,000 men; Breekenridge followed with another 10,-000. He says there is no truth in the report that they have been joined by Hill's corps. for up to Thursday last his troops were in entrenchments at Petersburg.

Cairo, August 2d. On the 30th, 200 guerrillas encountered a party of negro soldiers seven miles back from Wilson's Landing and repulsed them. The Federal cavalry were sent out next day from New Madrid and routed the rebels, killing and wounding a number. Our loss is trifling.

A QUERY .- The Union of this morning in giving an account of the fire that occurred in Chinatown on Sunday,

"Tom Poo, who keeps a saloon in Chinatown, called in the firemen and treated them to liquor and beer ad libitum. Tom is a clever fellow; but he ought to give up worshipping little wooden gods and become a good Chris-

HARD ON SALOON KEEPERS .- By a law of the last Legislature of California, saloon keepers are made liable for all costs and expenses incurred for trials etc., when parties commit a criminal offense under the influence of liquor, the costs to be levied by the Board of Supervisors, and divided pro rata among all the saloons in the county.

Was Incomer. A correspondent of lowing incident that actually occur-red : I have seen soldies chase hares of the leaden messengers of death were falling, thick and fast around them, and do many other cool and fool-ish things. But the followings which actually took place at Mine Run, surpasses everything I have seen or heard. On one of those biting cold mornings while the armies of Meade and Lee were staring at each other across the little rivulet known as Mine Rus, when moments appeared to be hours and hours days, so fear at head seemed the deadly strife, a solitary sheep leisprely walked along the Run on the rebel side. A rebel vedette fired and killed the sheep, and, diophing his gup, advanced to remove the prize of p an instant he was covered by a gun in the hands of a federal vedettey who said, "Divide is the word, or you are a dead Johnny". This proposition was assented, to end there, between the two skirmish lines, Mr. Rebel skinned the sheep, took obe-half, and moved back to his post, while his challenger in turn, dropped his gun, crossed the Run, got the other half of the sheep, and again resumed the duties of his post amid the cherry of his comrades, who expected to help him eat it. Of the hundreds of hostile men arrayed against each other on the bank of that Run, not one dared to violate the truce agreed upon by these two soldiers.

A. MORITED REBUKE. Judge Shepheard, of San Francisco, gave a severe rebake to a lawyer in the Police Court on Thursday. The attorney was defending Kahan, whose case we mentioned vesterday, as having defrauded S. Cohen by paying him in greebacks for a large of the deficient with in understanding that they were to be paid for in gold coin. The Bulletin says that when the case came up for examination the Police Justice observed that TO MAKE THE TARRA

"However it might bewir a legal point there was no doubt but the man acting thus was as guilty of fraud as the criminal pacing his cell at San Quentin. The counsel for the defendant here remarked that "It was a ques-tion whether the Government had not committed the fraud in issuing greenbacks." Upon which Judge Shepheard replied: Never let me hear another remark of that kind made in this Court. If it ever occurs again, I will commit the offender below for contempt, and perhaps for uttering trea-sonable language. It is neither your nor my place to question the acts of tolerated in this Court." The counsel "dried up," and the defendant was required to give \$1,000 bail to appear before the Grand Jury " 11.8
